**ALL AVAILABLE BOOKS WITH PHOTOGRAPHS ON OUR WEB-PAGE:**

**WeberRareBooks.com**

\* ORDERS CAN BE PLACED at: WeberRareBooks.com, or by either e-mailing or phoning to contact the business.

- 1389 **ABEL-SMITH, Brian** (1926-1996). *A History of the Nursing Profession*. London: Heinemann, 1977. ¶ 8vo. xiv, 290 pp. Frontis., 17 illus., 25 tables, index. Original wrappers. Ownership inked signature of Russell C. Maulitz. Very good. ISBN: 0435320041 \$ 9
- 1390 **ABBOTT, Alexander Crever** (1860-1935). *The Principles of Bacteriology: A Practical Manual for Students and Physicians*. Philadelphia: Lea Brothers & Co., 1895. ¶ 8vo. 493, [1], [16] (ads) pp. 98 figs., 17 in color, index. Maroon blind- and gilt-stamped cloth; joints and spine ends repaired with kozo, rear endleaf loose. Waterstained, not affecting text pages 1-166; p. 489 margin chipped. Inked owner signature and pencil notes on front paper, "R. Ronald Dettre, 1899". Good. \$ 3.95  
Third edition, enlarged and thoroughly revised.
- 1391 **ACHENBAUM, W. Andrew** (b. 1947). *Old Age in the New Land; The American Experience Since 1790*. Baltimore: Johns Hopkins University Press, 1979. ¶ Second printing. 8vo. xii, [2], 237, [1] pp. 18 tables, 8 illus., index. Brown gilt-stamped cloth. Near fine. ISBN: 080182107x \$ 7
- 1392 **ACKERKNECHT, Erwin Heinz** (1906-1988). *History and Geography of the Most Important Diseases*. New York: Hafner, 1972. ¶ Small 8vo. xiv, 210 pp. 13 maps and charts, index. Gilt-stamped brown cloth. Good plus. \$ 49

First edition. Preface by George Rosen (1910-1977). Ackernecht was a devoted Trotskyist who was forced to flee Germany after Hitler's rise to power. He became renowned in the United States as a historian of medicine, eventually chairing Wisconsin's department on the subject.

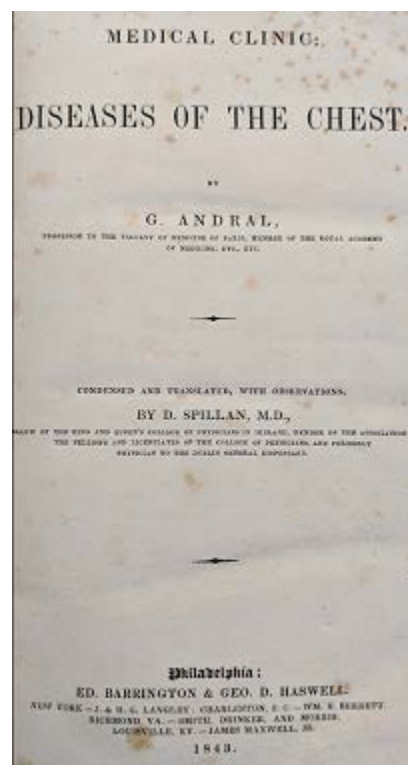

- 1393 **AITKEN, Sir William** (1825-1892). *On the Animal Alkaloids; the Ptomaines, Leucomaines, and Extractives in their Pathological Relations; Being a Short Summary of Recent Researches as to the Origin of Some Diseases by or Through the Physiological Processes Going On During Life*. Philadelphia: P. Blakiston, Son, and Co., 1887. ¶ 8vo. vi, [2], 61, [1], 14, [2] pp. Index, ads. Original black cloth with original paper label. Bookplate of Dr. James P. Marsh. Very good. \$ 25

First American edition. Sir William Aitken, who took his medical degree from the University of Edinburgh, was professor of pathology, Army Medical School. Among his experiences was to study the Crimean war and the diseases suffered by soldiers. He was elected a Fellow of the Royal Society in 1873, knighted in 1887.

- 1394 **ALEXANDER, Franz Gabriel** (1891-1964); **Sheldon T. SELESNICK** (1929-1967). *The History of Psychiatry; An Evaluation of Psychiatric Thought and Practice from Prehistoric Times to the Present*. New York: Harper & Row, 1966. ¶ First edition. 8vo. xvi, 471, [3] pp. 17 illus., figs., index. Black gilt-stamped cloth. Very good. \$ 3.95

- 1395 **ALLBUTT, Sir Thomas Clifford** (1836-1925). *The Historical Relations of Medicine and Surgery to the End of the Sixteenth Century*. London: Macmillan and Co., 1905. ¶ Small 8vo. xvi, 125, [1], [2] pp. Index. Navy blue gilt-stamped cloth. Multiple library rubber stamps, "The Property of the Medical Society City and County of Denver". Paperclip rust mark front end papers and half-title page. Very good. \$ 20

- 1398 **ANDRAL, Gabriel** (1797-1876). *Medical Clinic: Diseases of the Chest. Condensed and translated, with observations, by D. Spillan*. Philadelphia: Ed. Barrington & Geo. D. Haswell, 1843. ¶ 8vo. [2], iv, (13)-408. Modern two-tone red cloth with paper gilt-stamped label. Heavy foxing throughout. Ownership signature of Ashburn, NY 1845 (p.13). Very good. \$ 25

- 1399 **Pfizer Ltd.** *Corticosteroid Therapy; The First Hundred Years.* [England]: Pfizer, Ltd., 1956. ¶ 8vo. 92 pp. Diagrams, index. Blue gilt-stamped cloth; faded spine. Inked ownership signature of F. Allardral[?]. Very good. \$ 7  
The first edition of the book credits William H. Helfand (1926-2012), the noted scholar and collector of health ephemera, as author. Subsequent editions do not carry his name. An excellent example of a hybrid scientific ephemera: factual yet slanted toward Pfizer's products.
- 1400 **ASHLEY, Jo Ann** (1939-1980). *Hospitals, Paternalism, and the Role of the Nurse.* New York: Teachers College Press, 1977. ¶ 8vo. xi, [3], 158, [4] pp. Index. Original wrappers. Owner's name of Russell C. Maluitz (title page). Very good. ISBN: 080772470x \$ 11  
A groundbreaking work, published during the second wave of feminism, and accusing physicians and hospital administrators of paternalism and sexism regarding nurses. Alas, the subject has not yet become obsolete.
- 1401 **AYERS, Gwendolyn M.** *England's First State-Hospitals and the Metropolitan Asylums Board 1867-1930.* Berkeley: University of California Press, 1971. Tall 8vo. xxv, [1], 370 pp. Frontis., 9 plates, 12 tables, 2 maps, index. Blue gilt-stamped cloth, dust-jacket; jacket smudged with very small tears to spine ends and rear lower corner. Very good. ISBN: 0520017927 \$ 16  
Important book on public health, dealing with hospital history in the UK, also with sections on mental deficiency, epidemic diseases, ambulance service, medical education, child care, tuberculosis, homelessness & poor, the years of WWI, etc. Printed from UK sheets.
- 1402 **BAILLIE, Matthew** (1761-1823). *A Series of Engravings, Accompanied with Explanations, which are Intended to Illustrate the Morbid Anatomy of Some of the Most Important Parts of the Human Body.* Clayton: Melbourne University Press, 1986. Large 4to. [2], 228, [8] (index) pp. 73 plates, index. Maroon gilt-stamped lambskin, top edge gilt, burgundy velvet slipcase, by the Dove Bindery. 1989 printed review (by Russell C. Maulitz) is laid in. Fine. ISBN: 0522843123 \$ 425  
LIMITED EDITION of 520 copies, this copy is not numbered. Complete with insert, *William Clift's Copy of Baillie's Morbid Anatomy, [16 pp.]* authored by Harold Attwood (1928-2005), as new.  
"Baillie was a nephew and pupil of William Hunter. The above is the first systematic textbook of morbid anatomy, treating the subject for the first time as an independent science. See also Nos. 2736, 3167.1. Baillie was the last and most eminent owner of the famous gold-headed cane (No. 6709). His clear and comprehensive description of the

pulmonary lesions of tuberculosis could hardly be bettered today; he differentiated the nodular and infiltrating types. Page 87: First clear description of the morbid anatomy and symptoms of gastric ulcer.” – Garrison and Morton.

☼ Garrison and Morton 2281, 3218, 3427.

- 1403 **BARKER-BENFIELD, Graham John** (b. 1941). *The Horrors of the Half-Known Life; Male Attitudes Toward Women and Sexuality in Nineteenth-Century America*. New York: Harper & Row, 1976. ¶ 8vo. xiv, 352 pp. Index. Black purple-stamped cloth, dust-jacket; jacket extremities torn, spine faded. Very good. ISBN: 0060102241 \$ 5
- 1404 **BAUER, Louis Hopewell** (1888-1964). *Private Enterprise or Government in Medicine*. Springfield: Charles C. Thomas, 1948. ¶ First edition. 8vo. ix, [1], 201, [1] pp. Burgundy textured gilt-stamped cloth. Near fine. \$ 11
- 1405 **BAYER, Ronald** (b. 1943), **Gerald M OPPENHEIMER**. *AIDS Doctors: Voices from the Epidemic: An Oral History*. Oxford: Oxford University Press, 2000. ¶ 8vo. x, 310 pp. Glossary, index. White cloth-backed green-stamped boards, dust-jacket. Near fine. ISBN: 0195126815 \$ 10
- “Today, AIDS has been indelibly etched in our consciousness. Yet it was less than twenty years ago that doctors confronted a sudden avalanche of strange, inexplicable, seemingly untreatable conditions that signaled the arrival of a devastating new disease. Bewildered, unprepared, and pushed to the limit of their diagnostic abilities, a select group of courageous physicians nevertheless persevered. This unique collective memoir tells their story. Based on interviews with nearly eighty doctors whose lives and careers have centered on the AIDS epidemic from the early 1980s to the present, this candid, emotionally textured account details the palpable anxiety in the medical profession as it experienced a rapid succession of cases for which there was no clinical history. The physicians interviewed chronicle the roller coaster experiences of hope and despair, as they applied newly developed, often unsuccessful therapies. Yet these physicians who chose to embrace the challenge confronted more than just the sense of therapeutic helplessness in dealing with a disease they could not conquer. They also faced the tough choices inherent in treating a controversial, sexually and intravenously transmitted illness as many colleagues simply walked away. Many describe being gripped by a sense of mission: by the moral imperative to treat the disempowered and despised. Nearly all describe a

common purpose, an esprit de corps that bound them together in a terrible yet exhilarating war against an invisible enemy. This extraordinary oral history forms a landmark effort in the understanding of the AIDS crisis. Carefully collected and eloquently told, the doctors' narratives reveal the tenacity and unquenchable optimism that has paved the way for taming a 20th-century plague." – OUP.

Reviews: [1] A detailed oral history of the first decades of the AIDS epidemic, told from the vantage point of the treating physician...A cold and revealing history of an American archetype, sure to appeal to readers whose lives have been affected by AIDS."--Kirkus Reviews. [2] "It deserves to sit on the bookshelf alongside the earlier classics of the epidemic."--The New York Times Book Review. [3] "AIDS, the most dreaded plague of our epoch, has found its heroes. In this stunning document, doctors, unsung and uncelebrated, are meeting this challenge. Bayer and Oppenheimer, two masterful interviewers, have sounded, in the words of these heroes, a note of hope and possible triumph." -- Studs Turkel.

- 1406 **BEALLE, Morris Allison** (1891-1972). *The Drug Story*. Washington D.C.: Columbia, 1949. ¶ Second edition. 8vo. 239, [1] (ads) pp. Original printed wrappers; Pages age-darkened. SCARCE. Very good. \$ 45

- 1407 **BECK, Ann Frank** (1900-2002). *A History of the British Medical Administration of East Africa, 1900-1950*. Cambridge: Harvard University Press, 1970. ¶ First edition. 8vo. xiv, [2], 271, [1] pp. 12 tables, index. Orange black-stamped cloth, dust-jacket. Near fine. ISBN: 674401700 \$ 8

"Concerns modernization and development of scientific health services in Kenya, Uganda, and Tanganyika (now Tanzania) during the first half of the twentieth century." – Garrison and Morton 8496.

- 1408 **[BEDFORD, Davis Evan (1898-1978)] Royal College of Physicians of London. The Evan Bedford Library of Cardiology**. London: Royal College of Physicians, 1977. ¶ 8vo. xi, [1], 245, [1] pp. Frontis. portrait, index. Red blind-and gilt-stamped cloth. With printed note: With the compliments of the Librarian. Near fine. ISBN:0900596406 \$ 63

“Description of 1112 items with annotations by Bedford, who donated his collection to the Royal College of Physicians.” – Garrison and Morton 3161.42.

- 1409 **[BEESON, Paul Bruce (1908-2006)] RAPPORT, Richard. *Physician; The Life of Paul Beeson***. Ft. Lee: Barricade Books, 2001. ¶ 8vo. xxiv, 277, [1] pp. 24 illus., index. Red black-stamped cloth, dust-jacket. Near fine. ISBN: 1569802033 \$ 10

“In the 1950’s and 60’s, while he was the chairman of the department of medicine at Yale, Dr. Beeson conducted his penetrating research on the way in which infections with disease-causing organisms lead to fevers.

Working with Dr. Elisha Atkins and others, he demonstrated that fever was often a bodily response to infection, and was not merely caused by an attack by the foreign organisms, as had been theorized. The Yale researchers found that a substance released by the body’s white blood cells provoked a fever response. They isolated the substance, a protein called interleukin-1, and showed that it was released by white blood cells called leukocytes.” – *New York Times*, 8/18/2006.

- 1410 **BELL, Agrippa Nelson (1820-1911). *Climatology and Mineral Waters of the United States***. New York: William Wood, 1885. ¶ 8vo. vii, [1], 386 pp. Illus., tables, index. Original blind- and gilt-stamped olive-green cloth; both joints repaired with kozo. Good plus. \$ 7

- 1411 **BELL, Sir Charles (1774-1842). *Idea of a New Anatomy of the Brain***. London: Dawsons of Pall Mall, 1966. 12mo. xi, [1], 36 pp. Tan half gilt-stamped calf over marbled boards. Very good. \$ 50  
A nice facsimile edition of the 1811 original.

- 1412 **BERLANT, Jeffrey Lionel (b. 1945). *Profession and Monopoly; A Study of Medicine in the United States and Great Britain***. Berkeley: University of California Press, 1975. ¶ 8vo. xi, [1], 337, [1] pp. Index. Brown silver-stamped cloth, dust-jacket; jacket extremities a bit worn. Very good. ISBN: 0520027345 \$ 11

- 1413 **BERNARD, Claude (1813-1878). *Leçons de Pathologie Expérimentale et leçons sur les propriétés de la moelle épinière***. Paris: J.-B. Baillière et Fils. 1880. ¶ 8vo. [4] (ads), x, [2], 604 pp. Index. Modern cloth with original printed wrappers mounted both covers, gilt-stamped title-label. Various pages with gnawed-damage to upper gutter, pages 399-402 small missing section (not affecting text). Good in a fine cloth binding. \$ 75

Second edition (first issued in 1872). See: Garrison and Morton 2301.

- 1414 **BEVAN, Aneurin** (1897-1960). *In Place of Fear*. London: E.P. Publishing, 1976. ¶ 8vo. 203, [1] pp. Frontis. portrait, 18 illus. Burgundy gilt-stamped cloth, dust-jacket; jacket torn at lower corner. Very good. ISBN: 0715811681 \$ 20

A reprint of the 1961 edition, which was a reprint of the 1952 original edition, which was published on the tenth anniversary of the Beveridge Report. The 1952 edition reported on the progress of welfare-state reforms. The 1976 reprint has a foreword by Jennie Lee, Baroness Lee of Asheridge (1904-1988). As his widow she acts as the substitute interpretive eyes and thoughts of Bevin in 1976. The Foreword reflects the optimism and pessimism of Labor officials in the late 1970s. An excellent artifact for understanding the roots of the current global debate regarding welfare statism and unbridled global capitalism.

- 1415 [**BEVAN, Aneurin** (1897-1960)] **FOOT, Michael Mackintosh** (1913-2010). *Aneurin Bevan, A Biography. Volume Two: 1945-1960*. London: Davis-Poynter, 1973. ¶ 8vo. 692 pp. Frontis. portrait, 12 illus., index. Black gilt-stamped cloth, red spine, dust-jacket. Very good plus. ISBN: 0706700899 \$ 19

Volume Two of a two volume biography, written by a diehard leader of the left-wing of the Labour Party. The biography, while favorable, also benefits from Foot's insider knowledge of British politics.

- 1416 **BEVERIDGE, Sir William Henry** (1879-1963). [2 titles]: *Social Insurance and Allied Services; Report by Sir William Beveridge Presented to Parliament by Command of His Majesty November 1942*. [With]: *Social Insurance and Allied Services; Memoranda from organizations. Appendix G to Report by Sir William Beveridge*. London: His Majesty's Stationary Office, 1942. 2 volumes. Serial nos.: 6404 and 6405. ¶ 8vo. 299, [1]; iii, [1], 244pp. Tables. Original printed wrappers; staple bound, tear to lower front wrapper, not affecting text. Small staining along spine but interior text quite clean, some creasing. SCARCE ORIGINAL EDITIONS. Very good. \$ 300

First editions. Cmd. No. 6404. The report that created the British welfare state. Beveridge argues the five evils preventing recovery from the Second World War (perhaps channeling Dickens) are "Disease, Want, Ignorance, Squalor, and Idleness" (p. 6) and the welfare state remedies are presented as necessary to Britain's survival.

- 1417 **BILLINGS, John Shaw** (1838-1913). *The History and Literature of Surgery*. New York: Argosy-Antiquarian Ltd., 1970. ¶ 8vo. 132 pp. Magenta black-stamped cloth. Near fine. ISBN: 872660389 \$ 13  
Reprint of the 1895 original edition. Garrison and Morton 5799.

- 1418 **[BILLINGS, John Shaw (1838-1913)] CHAPMAN, Carleton B.** (1915-2000). *Order Out of Chaos: John Shaw Billings and America's Coming of Age*. Boston: The Boston Medical Library, 1994. ¶ 8vo. xvi, [2], 420, [4] pp. Frontis. portrait, 36 illus., index. Green blind- and gilt-stamped morocco, red morocco spine label. Near fine. ISBN: 0881351873 \$ 175

SPECIAL DELUXE BINDING ISSUE, being number 15 of 30 custom morocco bound copies, signed by the author. "Chapman's career in cardiology and research lasted from 1947 to 1966. He was on the internal medicine faculty of the University of Minnesota between 1947 and 1953, where he worked in the Laboratory of Physiological Hygiene directed by Ancel Keys. This laboratory traced its roots to the famous Harvard Fatigue Laboratory, which was operational in Boston from 1927 to 1947. It was in Minnesota that Chapman first combined his interest in cardiovascular medicine and exercise physiology and used invasive techniques to study the cardiovascular responses to exercise in normal human subjects and in patients with heart disease.

In 1953, he was recruited to be Chief of Cardiology in the Medicine Department being molded by Donald Seldin at the University of Texas Southwestern Medical Center in Dallas. It is interesting that Tinsley Harrison had preceded Chapman to Dallas, having been Chairman of this same department from 1944 to 1950. Chapman created the first Cardiac Catheterization Laboratory at Parkland Memorial Hospital in Dallas, and he also founded the Pauline and Adolph Weinberger Laboratory for Cardiopulmonary Research at UT Southwestern. In 1961, he was awarded one of the National Heart Institute's earliest Program Project Grants, entitled 'Response and Adaptation to Exercise,' which is still active today." – Jere H. Mitchell, Kern Widenthal, *Circulation* 2001; 104:1330-1331.

- 1419 **BLAKE, John Ballard** (1922-2006) [editor]. *Safeguarding the Public; Historical Aspects of Medicinal Drug Control*. Baltimore: Johns Hopkins University Press, 1970. ¶ 8vo. xi, [1], 200, [2] pp. Index. Charcoal gilt-stamped cloth; cloth with minor wear. Fading rubber state on front paper. Very good plus. ISBN: 080181054x \$ 5

Papers from a conference sponsored by the National Library of Medicine and the Josiah Macy, Jr. Foundation. Blake "made significant contributions to the field of medical history. He was educated at Yale, BA, 1943, with Honors in History, Harvard, MA, 1947, and Ph.D., 1954,

in American history. He was among the first generation of historians of medicine to come out of history departments, rather than clinical medicine, and he helped integrate the subject into the broader field of social history. His interests were primarily the history of public health in America and women's history. His books and articles dealt with public health in 18th and early 19th century Boston, medicine in colonial America, and women and medicine in 19th century America. He was active in the American Association for the History of Medicine, the chief professional organization for historians of medicine. He served as Secretary-Treasurer, Vice-President, and President" (Obituary, U.S. National Library of Medicine).

- 1420 **BLISS, Michael.** *The Discovery of Insulin*. Chicago: University of Chicago Press, 1982. ¶ 8vo. 304 pp. 5 charts, 35 illus., index. Maroon gilt-stamped cloth, dust-jacket; jacket rubbed. Very good. ISBN: 0226058972 \$ 15

- 1421 **BORDEU, Théophile de** (1722-1776). *Recherches Sur Le Tissu Muqueux Ou L'organe Cellulaire et Sur Quelques Maladies De La Poitrine. On y a joint une Dissertation du même Auteur, sur l'usage des Eaux de Baréges, dans les Ecouelles*. Paris: Pierre Franç., 1767. 12mo. [4], x, [2], 227, [3] pp. Modern marbled boards with red leather gilt-stamped label. Light foxing. Early inked inscription on editor's introductory page. Very good. \$ 220

First edition. This important work is one of the earliest works relating to the nature of cells and thus human histology. In his research on the mucous tissue, or the cellular organism, and on some in 1767, Bordeu wrote at length, and he seems to speak for the first time. This is the first time the word "tissue" is used to designate a cell organ and mucous membranes. The physiological acceptance was later taken up by Bichat in his *Traité d'anatomie* [treatise on general anatomy]. Bordeu, a known pioneer in endocrinology, can thus be considered as one of the precursors of histology with this particular work.

"... In his treatise: '*Recherche sur le tissu muqueux ou l'organe cellulaire*', published in 1767 in Paris, he describes what we consider since the advent of histology, connective tissues. He was the son of Théophile de Bordeu the elder; both were engaged in teaching at the ..." – J. Labat-Robert, & L. Robert, "Aging of connective tissues: experimental facts and theoretical considerations", *Aging*, 2014 - karger.com

"Having rid itself of ancient theories, 18th-century medicine incorporated chemistry and physics in an attempt to explain the phenomena of life. This was a time characterized by lively debates and heated controversies between medical movements, schools of thought,

and the defenders of medical and philosophical doctrines. This intense intellectual activity heralded medicine's entry into the modern era, with the emergence of new subjects like biology, physiology, anatomical pathology, and histology. In France, the doctrine of vitalism was born in Montpellier, enunciated by Théophile de Bordeu and Paul-Joseph Barthéz, professors famed throughout 18th-century Europe. This doctrine asserted that the phenomena of life were not subject solely to the laws of physics and chemistry, but also to a "vital force." – Christian Régnier, "A Touch of France: The Medical Faculty of Montpellier: one thousand years of medicine." *Medicographia*, 2015.

The book is dedicated to Antoine de Bordeu (1695/6-1777), counsellor to the king and director of the mineral waters of Baresges as used at the military hospital. See: Jean-Jacques Ferrandis & Jean-Louis Plessis, "Théophile de Bordeu (1722-1776) Un homme d'esprit, de connaissances éclectiques et sachant séduire."

- 1422 **BRAND, Jeanne L.** *Doctors and the State; The British Medical Profession and Government Action in Public Health 1870-1912.* Baltimore: Johns Hopkins University Press, 1965. ¶ 8vo. xiii, [3], 307, [1] pp. 3 tables, 2 illus., index. Grey gilt-stamped cloth, dust-jacket; jacket torn, rubbed, minor wear to cloth. Generally, very good. \$ 7
- 1423 **BRODIE, Sir Benjamin Collins** (1783-1862). *Autobiography of the Late Sir Benjamin C. Brodie, Bart.* London: Longman, Green, Longman, Roberts, & Green, 1865. ¶ Small 8vo. vi, 187, [1], 32 pp. Ads (dated July 1864). Original maroon blind- and gilt-stamped cloth; spine ends a bit frayed. Very good. \$ 90
- First edition. Foreword by Brodie's son, Benjamin Collins Brodie, 2<sup>nd</sup> Baronet. "Brodie's scientific career has three aspects: he was a researcher, a surgeon, and general practitioner, and a member of the medical establishment...He was elected a member of the Royal Society, at the age of twenty-six, in February 1810, and in 1811 was awarded the Copley Medal, the youngest member ever to receive it. ... Brodie was an excellent diagnostician and built a flourishing practice as the leading surgical consultant. He became personal surgeon to King George IV in 1828, and president of the Royal College of Surgeons in 1844, having been an active member of its council for a number of years. He was knighted in 1834, and three years later, as he felt befitted his new station in life, bought a landed estate in Surrey." – *DSB Vol. II*.
- 1424 **BROUSSAIS François Joseph Victor** (1772-1838). *Traite de Physiologie Appliquée à la Pathologie.* [2 volumes]. Paris: Chez M.<sup>ELLE</sup> Delaunay, 1822-23. ¶ Two volumes. 8vo. [4], 361, [1]; 575, [1] pp. Contemporary quarter gilt-stamped calf, marbled boards; worn, vol. I

rebacked with cloth, mounting original leather remnants. Volume I title-page waterstained. Yale Medical Library bookplate and rubberstamps, Gift of John R. Paul, "withdrawn." Penciled name and date of Lemuel J. Deal M.D. 3.15/07. Inked notation on title-page volume I, "Berland's edition of Bichat's 'Anatomical Generale'". Good. \$ 145

First edition, with the publisher's inked stamp signature (vol. II). "Broussais lived at a time when a monistic system of pathology was still possible. His was a kind of 'Brownism' in reverse, in which the phenomena of illness are different from those of health only in intensity. Laennec and Bretonneau opposed a doctrine inspired by old theories of deep pathological states that did not admit individual illnesses, and desperately fought the idea of specificity, localization, or contagion. Everything came under the heading of gastroenteritis, and consequently was treated by repeated bleedings and debilitating diets. These had disastrous effects on patients who were hemorrhaging or who suffered from cancer, malaria, or syphilis. Some have wished to see Broussais's ideas on the nonspecific states of inflammation as making him a precursor in this field." – DSB, II, p. 508. "This work on physiology incorporates many of Broussais' imaginative theories on the origin and nature of disease, was first published in France in 1822-1823". – Heirs of Hippocrates 1266 (1st English edition).

"Cet ouvrage est remarquable par la clarté, la concision avec laquelle les faits sont exposés, et surtout par la profondeur des déductions. On reconnaît, comme il le dit lui-même, l'héritier des idées de Bichat, fécondées par leur application à la pathologie". – Michel Valentin & F. J. V. Broussais, *François Broussais, empereur de la médecine: jeunesse, correspondance, vie et oeuvre*, Dinard: Association des amis du Musée du pays de Dinard, 1988.

PROVENANCE: Dr. Lemuel J. Deal (1842-1928), member Medical Club of Philadelphia – John Rodman Paul (1893-1971), American virologist, professor at Yale University, Yale School of Medicine, won the Medal of Freedom, honorary member of the Royal Society, member of the Polio Hall of Fame – Yale University (withdrawn).

- 1425 **BROWNE, Sir Thomas** (1605-1682). *Religio Medici and Christian Morals*. London: Thomas Nelson and Sons, 1940. 16mo. 192 pp. Brown gilt-stamped cloth, dust-jacket; lightly worn jacket. Very good. \$ 10
- 1426 **BLOOMFIELD, Arthur L.** (1888-1962). *A Bibliography of Internal Medicine Communicable Diseases*. Chicago: The University of Chicago Press, 1958. ¶ Thick 8vo. viii, 560 pp. 1 table, index. Red gilt-stamped cloth, dust-jacket; jacket worn. Inked owner name Russell C. Maulitz. Very good copy of book in a good jacket. \$ 12

“An extensive bibliography, and substantial excerpts from practically every important reference made to each of 30 communicable diseases, from 1800 onwards.” – Garrison and Morton 5546.6.

- 1427 **BOYLAN, Brian Richard** (1936-2005). *The New Heart*. Philadelphia: Chilton Book Company, 1969. ¶ 8vo. xii, 211, [1] pp. Index. Red silver-stamped cloth, dust-jacket; jacket with short tear. Very good +. \$ 15

*A History of Home Nursing Care*

- 1428 **BUHLER-WILKERSON, Karen** (1945-2010). *No Place Like Home; A History of Nursing and Home Care in the United States*. Baltimore: Johns Hopkins University Press, 2001. ¶ 8vo. xiv, [2], 293, [1] pp. 15 figs., 8 illus., 1 table, index. Navy blue gilt-stamped cloth, dust-jacket; jacket with minor wear. Very good. ISBN:0801865980 \$ 11

“Dr. Buhler- Wilkerson taught at the University of Pennsylvania School of Nursing from 1972 until her death... She published three books and 40 articles, but is best known for her award-winning book, *No Place Like Home: A History of Nursing and Home Care in the United States*. Fascinated by place, and its influence on the delivery of health care, Dr. Wilkerson traces home care from its earliest beginnings in 1813, by the Ladies Benevolent Society in Charleston, South Carolina, where Karen spent much of her later childhood, to its reinvention with the Visiting Nurse Service, under the leadership of Lillian Wald, in New York City in the late 19th and early 20th centuries. The story culminates with the role of Medicare in the delivery of home care services, a story still unfolding today” (*In Memoriam Penn*

*Nursing News*, 2010).

- 1429 **BULLOCH, William** (1868-1941). *The History of Bacteriology*. London: Oxford University Press, 1960. ¶ Reprint. 8vo. xii, 422, [2] pp. 16 plates, 36 illus., index. Green-gilt-stamped cloth, dust-jacket; jacket with scotch-tape repair to spine, fading, and chips. Red ink underling and marginalia throughout. Good, but otherwise a better copy than indicated. \$ 10

“This pioneering and classic history includes brief biographical notes of the more important workers (arranged in a separate section), and an extensive bibliography.” – Garrison and Morton 2580.

- 1430 **BURNETT, James Compton** (1840-1901). *Curability of Tumors by Medicines*. Philadelphia: Boericke & Tafel, 1901. ¶ Small 8vo. 345, [1] pp. Index. Red blind- and gilt-stamped cloth; mild wear. RARE. Very good. \$ 50

Second edition, revised. This book, reviewed contemporaneously: "If this book recounted one or two isolated cases of tumors disappearing at a time the patient happened to be taking medicine, we would discard it as unworthy of notice. On the contrary, numerous cases are reported in extenso in a way that fairly staggers those who, like the reviewer, hold pessimistic views concerning the curability of tumors by medicines. Certainly one cannot get around Dr. Burnett's statements by saying that he was favored by coincidences, for his cures are too many; nor can they charge him with diagnostic mistakes, for his writings show that he knows whereof he speaks. We take pleasure in commending the work to our readers. We must say, however, that we still favor surgical measures as the most certain, at least in the hands of the average man, - but inasmuch as there are numerous instances in which surgery is inadmissible, there will be abundant opportunity of attempting to follow in Dr. Burnett's footsteps." – *The Hahnemannian Monthly*, volume 36, p. 60.

- 1431 **BYNUM, William** (b. 1943); **C. LAWRENCE; Vivian NUTTON** (b.1943) [eds.]. *The Emergence of Modern Cardiology*. - 1432 **CABANIS, Pierre-Jean-Georges** (1757-1808). *On the Relations Between the Physical and Moral Aspects of Man*. [2 volumes]. Baltimore: Johns Hopkins University Press, 1981. Two volumes. Tall 8vo. xci, [1], 357, [1]; [4], 363-796 pp. Frontis. portrait, indices. Blue gilt-stamped cloth. Volume I with small chip on front paper. Near fine. ISBN: 0801821134 \$ 138

English edition. Translated by Margaret Duggan Saidi. Edited by George Mora. Introductions by George Mora and Sergio Moravia (b. 1940).

"Early in 1796, Pierre-Jean Georges Cabanis began a series of lectures at the newly founded National Institute for the Arts and Sciences at Paris. Later he published a much expanded version of those lectures, "*On the Relations Between the Physical and Moral Aspects of Man*." The volumes under review claim to be the first English translation of a second, 1805, edition of that book. Cabanis was intimately associated with many of the famous philosophes-ideologues -journalists who

contributed to the revolutionary phase of the Enlightenment and who defended the Revolution after it happened. In these lectures, at least, he exhibits no interesting variations from what we have come to think of as their type. He saw his part, in a great movement for the liberation of the human mind, as a continuer of the work of those classical and modern scientists and philosophers who sought to demystify the body-soul relationship. He wanted to give a completely naturalistic account of the relation between, on the one hand, extension, organisms, the man's own body and brain, and on the other, thinking, feeling and psychology. In the first nine of twelve chapters, Cabanis treats of such subjects as the influence of age, sex, "humor," illness, regimen and climate on what he calls "moral disposition and affections," on what we would now call sensibilities or psychology. In the last three chapters he turns to the other side of the coin, to the influence of mind and feelings on the body. In this way he tries to avoid the crude reductionism involved in explaining thought, feeling and evaluation in purely physical terms. I say "tries to," for he seems not to realize that a description of two kinds of determination does not add up to an account of the relation between the two. Most of the time Cabanis leans toward a simple reduction of "the moral" to the physical. He says, "The principle of the moral sciences..., would enter the physical. They would be no more than a branch of the natural history of man." (p. 13). Elsewhere, "all of the phenomena of the intellect and of the will have their sources in the inborn or acquired state of the constitution." (p. 363). – Robert J. McShea, Review, *Journal of the History of Philosophy*. Volume 21, Number 4, October 1983 pp. 577-578.

- 1433 **CAMERON, Hector Charles** (1878-1958). *Mr. Guy's Hospital 1726-1948*. London: Longman's Green, 1954. ¶ First edition. 8vo. xiii, [1], 520 pp. Frontis., 48 plates, 6 illus., index. Blue gilt-stamped cloth, dust-jacket; jacket extremities slightly worn. Very good +. \$ 15

- 1434 **CANGUILHEM, Georges** (1904-1995). *On the Normal and the Pathological*. Dordrecht: D. Reidel, 1978. ¶ Series: Studies in the History of Science, Number 3. 8vo. xxv, [1], 208, [2] pp. Frontis., index. Brown blind- and gilt-stamped cloth, dust-jacket; jacket quite faded with nicks. Minor red ink marginalia and underlining. Author inked name, "Maulitz" on front paper. Very good. ISBN: 27709076 \$ 20

Translated from the 1972 French edition by Carolyn R. Fawcett. Robert Sonne Cohen contributed editorial collaboration. Michael Foucault (1926-1984) wrote the Introduction for this edition. Canguilhem attacks the very notion of what is and is not a disease, and he questions the philosophical and etiological precepts of medicine that define what, exactly, a disease is. He argues no list of symptoms and signs or measurement of deviation from a statistical norm can form the basis of a

definition of disease. Such a definition must instead be based on the abnormalities of the mechanisms involved, rather than the effects of those mechanisms.

- 1435 **CANANO, Ioannes Baptista** (1515-1578); **GIROLAMO da CARPI** (1501-1556). *Musculorum Humani Corporis Picturata Dissectio (Ferrara 1541?)*. Florence: R. Lier & Co., 1925. ¶ 8vo. 98, [2] pp. 27 illus. Quarter beige brown-stamped cloth over grey paper; library markings. Very good. \$ 300

Facsimile edition. Annotations by Harvey Cushing (1869-1939) and Edward Clark Streeter (1874-1947). "The first book in which each muscle was illustrated separately, with copper-plates of the bones and muscles of the upper limb from drawings by Girolamo da Carpi, which in realism and exactitude surpassed anything between Leonardo and Vesalius. But having seen the woodcuts in Vesalius's *Fabrica*, the high-minded Ferrarese is said to have deliberately "suppressed his own book, and only 11 copies are now extant" (A. C. Klebs). This work was reprinted in facsimile in Florence, 1925, edited by Harvey Cushing and Edward Clark Streeter." – Garrison and Morton.

 ☼ Garrison and Morton 2581.8.

- 1481 **FOSTER, Michael** (1836-1907). *A Textbook of Physiology. Second edition, revised and enlarged*. London: Macmillan, 1878. ¶ Thick 8vo. xii, 640 pp. 64 illus., tables, index. Original green blind- and gilt-stamped cloth; cloth fading, some staining, and wear to extremities, joints repaired with kozo. Inked owner's signature (& initials) on title page of Charles James Devis. Portrait of the author mounted on inside cover. Good. \$ 37

“Foster was one of the greatest of the modern teachers of physiology. He became professor at Cambridge in 1883. Many great scientists are numbered among his pupils.” – ☀ Garrison and Morton 631./

PROVENANCE: Charles James Devis (1852-1892), M.R.C.S.E., L.S.A. London, formerly of Birmingham, eldest son of the Reverend Charles Walter Devis (1829-1915), B.A. Cantab., Queen's College, married Alice Cattell.

- 1482 **FRANCIS, George William** (1800-1865). *The Dictionary of Practical Receipts; Containing the Arcana of Trade and Manufacture; Domestic Economy; Artistical, Ornamental & Scientific Processes; Pharmaceutical and Chemical Preparations, etc. etc. etc. New and Improved Edition, with Copious Index.* London: J. Allen, 1853. ¶ 8vo. [4], 348, 32, [14] pp. Figures, index, ads; light foxing. Green gilt-stamped cloth; wear, bumped corners, small ink stains, and some wear to extremities, joints reinforced with kozo. Good plus. \$ 135

"I have prepared this work as one of general reference and universal information; useful to the Tradesman and the Artist, by informing them of the operations and processes of others, —to the Chemist and Druggist as a *vade mecum* of all his professional formulæ;—to the Amateur, as a

book of constant reference, and to the Manager of a Family, as a faithful synopsis of saving expense, and procuring or using a material or preparation which most frequently cannot be purchased without much difficulty and delay.” – From the preface.

Equal parts cookbook, encyclopedia, pharmacopeia, and home economics manual, *The Dictionary of Practical Receipts* contains instructions on everything from baking crumpets to poisoning crickets to dying silk crimson [and that’s just “cre” through “cru”]. The text offers countless fascinating insights into British life in the mid-nineteenth century, with a level of objectivity and scientific precision rarely found in similar books written during the period.

Born in London, Francis spent his early years as a popular science writer and editor, and edited the first five volumes of the *Magazine of Science and School of Arts*. In 1849 he emigrated with his family to Australia, where he was appointed the director of the Adelaide botanical garden, a position he held until his death.

RARE. \$ 50

PROVENANCE: Frederick Haselfoot Haines, [fl. 1900-08] Esq., M.R.C.S, L.R.C.P., D.P.H., is listed as a Corresponding Member of the American Museum of Natural History, in its 1921 53<sup>rd</sup> annual report. [Member: Royal College of Surgeons, Licentiate Royal College of Physicians, Doctor of Public Health].

- 1497 **GIBSON, Alexander George** (1854-1913). *The Mycoses of the Spleen*. London: Kegan Paul, Trench, Trübner & Co., 1930. ¶ 8vo. xii, 169, [1] pp. 15 figs. [some color], index. Greenish-blue gilt-stamped cloth. Ownership inscriptions of Francis Graham Crookshank, and possibly the source of the inscription: "F. G. Crookshank 57a Wimpole St. - Dr. Gibson 27 Banbury Rd. Oxford," with detailed marginalia and underlining throughout. Near fine. \$ 38

Mycoses is a disease caused by infection with a fungus, such as ringworm or thrush.

PROVENANCE: Francis Graham Crookshank (1873-1933) British epidemiologist, medical and psychological writer, and fellow of the Royal College of Physicians. He was also a eugenicist and scientific racist, and is best remembered today as the author of the pseudo-scientific tract *The*

*Mongol in Our Midst: A study of Man and his Three Faces*, in which he argued that Down Syndrome was the result of race mixing. Crookshank's ink manuscript notes in this copy (mostly from the beginning to page 48) are somewhat remarkable in their pugnacity—his principle interest appears to be critiquing Gibson's work as well as the man himself, rather than actually learning from the text.

- 1498 **GIFFORD, George Edmund** (b. 1933) (editor). *Physician Signers of the Declaration of Independence*. New York: Science History Publications, 1976. ¶ 8vo. [6], 164 pp. Illus., portraits, index. Brown blind- and gilt-stamped cloth. Fine. ISBN: 0882021591 \$ 26

Five signers of the *Declaration* were physicians: Josiah Bartlett and Matthew Thornton of New Hampshire, Oliver Wolcott of Connecticut, Lyman Hall of Georgia and Benjamin Rush of Pennsylvania.

- 1499 **GIFFORD, James Fergus** (1940-2002). *The Evolution of a Medical center; A History of Medicine at Duke University to 1941*. Durham: Duke University Press, 1972. ¶ 8vo. viii, [4], 249, [1] pp. 15 plates, tables, index. Blue cloth with white and gilt-stamped spine, dust-jacket; jacket rubbed. Large inked price on front page. Very good. ISBN: 082230290x \$ 11

Gifford was Archivist at the Duke University Medical Center Library.

- 1500 **GILLISPIE, Charles Coulston** (1918-2015). *Science and Polity in France at the End of the Old Regime*. Princeton: Princeton University Press, 1980. ¶ 8vo. xii, 601, [3] pp. 3 illus., 1 chart, 2 tables, index. Blue gilt-stamped cloth, minor fraying, dust-jacket; jacket faded, rubbed. Ownership inked signature of Russell C. Maulitz. Very good. ISBN: 0691082332 \$ 40

“From the 1770s through the 1820s the French scientific community predominated in the world to a degree that no other scientific establishment did in any period prior to the Second World War. In his classic *Science and Polity in France: The End of the Old Regime*, Charles Gillispie analyzed the cultural, political, and technical factors that encouraged scientific productivity on the eve of the Revolution. In the present monumental and elegantly written sequel to that work, which Princeton is reissuing concurrently, he examines how the revolutionary and Napoleonic context contributed to modernization both of politics and science...*Charles Coulston Gillispie* is Dayton-Stockton Professor Emeritus of History at Princeton University where he founded the program in History and Philosophy of Science in 1960.” –*Princeton University Press*.

"Gillispie is, clearly, thoroughly at home in the language and concepts of the sciences: of pure mathematics, chemistry, mathematical physics and astronomy, biology and natural history, not to mention engineering, mining, and agronomy. He is also a master of lucid explanation, so far as explanation to the ignorant can go, as well being the teller of some highly gripping tales; and he has an admirable, logically taut, often quietly witty, prose style."-- P.N. Furbank, *New York Review of Books*.

- 1501 **GOLDZIEHER, Max Alexander** (1883-1969). *The Endocrine Glands*. New York: D. Appleton-Century, 1939. ¶ Thick 8vo. xvi, [2], 916 pp. 271 figs., index. Burgundy blind- and gilt-stamped cloth. Near fine. \$ 42
- "Goldzieher for many years studied the subject of endocrinology, and in this work dealt very fully with its history, theory, and practice." – Garrison and Morton 3802.

- 1502 **GOLDWATER, Leonard John** (1903-1992). *Mercury: A History of Quicksilver*. Baltimore: York Press, 1972. ¶ 8vo. xi, [3], 318 pp. 25 tables, 19 figs., index. Green blind- and silver-stamped cloth. AUTHOR'S INSCRIPTION (on title), "To Russell C. Maulitz, First of a kind. With best wishes. Leonard J. Goldwater, Duke Univ. March 1973". Near fine. ISBN: 0912752017 \$ 76

First edition. "The author has had lengthy experience with the problems of the use and abuse of mercury as seen in occupational medical practice, and is thus an ideal person to trace, as he does, the story of mercury from the earliest times to the present. He deals with it in medicine, science, and technology, and especially in the last two decades when increasing attention has been given to environmental pollution." – *Medical History*, Vol. 21, Issue 4 [Oct. 1977], p. 461.

- 1503 **GOSSELIN, Leon** (1815-1887). *Clinical Lectures on Surgery; Delivered at the Hospital of La Charite*. Philadelphia: Henry C. Lea, 1878. ¶ 8vo. iv, 346, vi (index) pp. 21 figs., 1 table, index. Early purple cloth, black gilt-stamped spine label; some fraying at extremities. Light foxing. Multiple Inked owner surnames [McLaughlin] on title. Very good.

\$ 200

Translated from the French by Lewis Atterbury Stimson (1844-1917). Lecture content: Surgical Diseases of Youth; Fractures of the Limbs; Traumatic Osteitis and Necrosis;

Traumatic fever, Pyaemia and Septicaemia; Diseases of the articulations; Phlegmons, Abscess, Fistula.

Léon Athanase Gosselin (1815-1887) was a French surgeon remembered for describing the Gosselin fracture in 1866. He was chief of surgery at the Hôpital de la Charité in Paris. During his career, Gosselin excelled in the fields of orthopedics, anatomy, physiology and urology. He is remembered for his research on diseases of the testicles, spermatic cord and scrotum, and their effect on fertility and virility. In this regard he is considered a pioneer of andrology. – Vladimirov, L.; Diamantis, A.; Karamanou, M.; Androustos, G. (June 2009). "Léon Athanase Gosselin (1815–1887) et ses recherches sur les maladies du testicule". *Andrologie*. 19 (2).

\$ 2000

First edition. INSCRIBED BY EDWARD DELOS CHURCHILL TO JOHN HEYSHAM GIBBON, INVENTOR OF THE HEART-LUNG MACHINE. The unique inscription in this copy of MacCallum's biography of Halsted, may well refer to a watershed moment in cardiac surgery, that led to the development of technology and techniques that saved, over the past sixty years, millions, of lives. Gibbon was a research fellow working under Edward Delos Churchill in 1930-1931, and together they performed numerous experimental surgeries aimed at increasing survival rates for open heart surgery patients (Hurst, Conti, and Fye, *Profiles in Cardiology*, 2003). A review of Churchill's archival papers, at the Harvard University Library, show six correspondences with Gibbon, and in two of them Churchill refers to Gibbon as "Jack".

PROVENANCE: Edward Delos Churchill (1895-1972) was a noted thoracic surgeon. John Heysham Gibbon, Jr. (1903-1973) is best known for inventing the heart-lung machine and pioneering many techniques in open heart surgery. Gibbon's impetus for devising the heart-lung machine stemmed from an emergency surgery he performed with Churchill at Massachusetts General Hospital in 1930. "In 1930 he found himself assisting Dr. Edward Churchill in an emergency pulmonary embolectomy. At that time the procedure was one of desperation as no patient in the U.S. had survived the removal of blood clots in open-heart surgery. As Dr. Gibbon recorded the patient's waning vital signs prior to the procedure he thought, 'If only we could remove the blood from her body by bypassing her lungs, and oxygenate it, then return it to her heart, we could almost certainly save her life.' Despite a successful removal of large clots from the patient's pulmonary artery, she never regained consciousness. This 'critical event' initiated Gibbon's determination to produce a heart-lung machine" (Thomas Jefferson University Digital Commons) – Jefferson Univ. (web source).

- 1514 **[HAMILTON, Alice (1869-1970)] SICHerman, Barbara (b. 1934). *Alice Hamilton; A Life in Letters*. Cambridge: Harvard University Press, 1984. ¶ First edition. 8vo. xiv, [2], 460 pp. Frontis. portrait, 11 illus., index. Two-toned purple-grey silver-stamped cloth, dust-jacket; light wear to jacket (rubbed & faded). Very good. ISBN: 0674015533 \$ 8**

"She was first considered subversive during World War I, yet she lived to protest our involvement in Vietnam. She was America's foremost industrial toxicologist, a pioneer in medicine and in social reform, long-time resident of Hull House, pacifist and civil libertarian. She was Edith Hamilton's sister, and the first woman on the faculty of Harvard, though she retired--an assistant professor in the school of public health--ten years before women medical students were admitted. This legendary figure now comes to life in an integrated work of biography and letters. A keen observer and an extraordinarily complex woman, Alice Hamilton left

a rich correspondence, spanning the period from 1888 to 1965, that forms a journal of her times as well as of her life. The letters document the range of her involvement, from the battle against lead poisoning to debates with Felix Frankfurter over civil liberties. But as Alice Hamilton describes a woman's medical education in the late nineteenth century, her unlikely adventures in city slums, mine shafts, and factories, her work with Jane Addams and the women's peace movement, we also witness the stages of one woman's evolution from self-deprecating girl to leading social advocate. The charming details of her girlhood help us to understand her conflicted need to escape Victorian constraints without violating her own notion of femininity, a dilemma resolved only by a career combining science with service. Beautifully realized works themselves, these letters have been woven by Barbara Sicherman into an exemplary biography that opens a window on the Progressive era." – Jacket.

- 1515 **HANNAWAY, Caroline; Victoria A. Harden; John Parascandola** (b. 1941) (editors). *AIDS and the Public Debate*. Amsterdam: IOS Press, 1995. ¶ 8vo. [8], 216 pp. Figs., index. Printed hardcover. Letter from Caroline Hannaway and Victoria A. Harden, presenting medical historian Russell C. Maulitz with a complimentary copy of the work. Very good. ISBN: 9051991908 \$ 40

Hannaway is the current Delegate for the American Association for the History of Medicine. Harden "retired in January 2006 as Director of the Office of NIH History and the Stetten Museum at the National Institutes of Health, an office she created during the 1986-87 observance of the NIH centennial" – NIH. Parascandola was the Historian for the Public Health Service. A quite catholic array of essays devoted to the AIDS crisis and public health.

- 1516 **HARE, Ronald** (1899-1986). *Pomp and Pestilence; Infectious Disease It's Origins and Conquest*. London: Scientific Book Club Edition [Gollancz], [1954?]. ¶ 8vo. 224 pp. Index. Lime-green maroon-stamped cloth, dust-jacket; jacket worn and chipped. Pages age darkened. Good. \$ 10

Hare, a lab assistant working at St. Mary's Hospital in 1928, unraveled the series of accidents leading to the discovery of penicillin. "Penicillium grows at a temperature (20 C) different from the Staphylococcus (35 C). What had happened in Fleming's Laboratory? First, the Penicillium had floated in the window from another Laboratory downstairs and settled on an agar plate streaked with Staphylococcus. For some reason Fleming did not put that particular dish in the refrigerator, but left it on his bench before going on holiday. Consulting the meteorological records for London for the end of July 1929- the year

of discovery - Ronald Hare found that there had been an exceptionally cool period of nine days (favouring the growth of the mold), after which the temperature rose (thus favouring the growth of the Staphylococcus). The Penicillium was by that stage producing such quantities of its miraculous antibiotic that when Fleming returned from holiday he noted the destruction of the Staphylococcus. Without those nine cool days nothing would have happened. Professor Ronald Hare was Professor of Bacteriology at the University of London from 1946 to 1964. In 1936 he was appointed Research Associate at the University of Toronto and later was largely responsible for the planning and building of the Penicillin Production unit set up by the Canadian Government" (*Penicillin and a Series of Fortunate Events*, BMJ, May 17, 2007).

- 1517 **HARRIS, James E.; Kent R. Weeks** (b. 1941). *X-Raying the Pharaohs; The Most Important Breakthrough in Egyptology Since the Discovery of Tutankhamon's Tomb. Illustrated with the Original X-Rays and Other Photographs*. New York: Charles Scribner's Sons, 1972. ¶ 8vo. 195, [1] pp. 4 color photographic plates, 40 black-and-white x-ray plates and photographs, 3 illus., kinship chart, index. Black green-stamped cloth, dust-jacket; jacket showing light wear. Very good. \$ 17

This is a book with a wide audience: physicians, medical historians, amateur and professional Egyptologists, and adolescents. Harris, a professor of Orthodontics at the University of Michigan, and Weeks, a prominent Egyptologist, used radiology to answer many open questions about the health of pharaohs and burial practices.

- 1518 **HARRISON, Tinsley Randolph** (1900-1978). *Failure of the Circulation*. Baltimore: Williams & Wilkins, 1936. ¶ Reprint (1936). 8vo. xii, 396 pp. Indices. Blue gilt-stamped cloth. Very good +.

\$ 150

“The book contains an enormous amount of information, much of which is based upon Dr. Harrison’s own observations. The style is clear and the presentation log ideal. The monograph is heartily recommended to all who are interested in the study of the circulation. It can be read with profit, and, it is fair to add, with pleasure, both by investigator and practitioner.” – Robert L. Levy, *American Heart Journal*, 1940, Vol. 19, Issue 1 [review of the second edition]. As for the author, “Tinsley (1900–1978) would graduate from the Johns Hopkins University School of Medicine in 1922 — where he was a classmate, roommate and tennis doubles partner of Johns Hopkins’ future surgeon-in-chief Alfred Blalock — and ultimately become “one of the most important and pivotal medical doctors in U.S. history,” according to his biographer and protégé, James Pittman Jr. (1927–2014). Harrison is best remembered for Harrison’s Principles of Internal Medicine, published in 1950, reprinted 16 times, translated into 14 languages, and perhaps the world’s most-used and best-selling internal medical text. He was the first chair of medicine and dean of the Medical College of Alabama, now part of the University of Alabama at Birmingham” – Neil A. Grauer, *Johns Hopkins Medicine*.

- 1525 **HODGKIN, Alan Lloyd** (1914-1998); **et.al.** *The Pursuit of Nature; Informal Essays on the History of Physiology*. Cambridge: Cambridge University Press, 1977. ¶ 8vo. [6], 180 pp. Figs., indices. Brown gilt-stamped cloth, dust-jacket; jacket with small tear at top edge. Very good. ISBN: 0521215056 \$ 12  
 Includes 6 essays: I: Nobel Laureate Hodgkin [*Chance and Design in Electrophysiology: An Informal Account of Certain Experiments on Nerve Carried Out Between 1934 and 1952.*]; [II]: Andrew Fielding Huxley [Looking back on muscle]; IV: Wilhelm Feldberg [The early history of synaptic and neuromuscular transmission by acetylcholine: reminiscences of an eye witness]; V: William Albert Hugh Rushton [Some memories of visual research in the past 50 years], Roderic Alfred Gregory [The gastrointestinal hormones: a historical review]; VI: Robert Alexander McCance [Perinatal physiology].  
 “This book consists of essays on the historical development of six fields of physiology which have flourished in recent decades. They were written as part of the celebrations of the Centenary of the Physiological Society in 1976. The authors are leading physiologists in their respective fields and are not only eye witnesses of the major developments: in many cases they were themselves the major discoverers. The essays therefore give unique personal accounts which convey much of the fun and the trouble which accompanies research.” – jacket.

With a biographical memoir of Jackson, by James Taylor (1859-1946), and "recollections" of Sir Jonathan Hutchinson and Charles Mercier. Jackson was an English Neurologist, best known for his research on epilepsy.

"For most of Jackson's ideas it is impossible to indicate in a brief summary either their breadth and subtlety or the rich accumulation of diverse clinical phenomena supporting them...

Although acclaimed as the greatest British scientific clinician of the nineteenth century, he carried out no experiments and rarely employed the microscope; but he was acutely aware of their importance and was widely read in the literature. He was devoted to clinical observation, to the analysis of facts, and to philosophic reasoning.

Thus armed, Jackson profoundly influenced all of the neurological sciences. He applied the data of abnormal functioning to the elucidation of the normal action of the nervous system. Jackson's creed was as follows: 'I should be misunderstood if I were supposed to underrate the physiological study of disease of the nervous system. Indeed, I think that to neglect it shows want of education, but to neglect the clinical shows want of experience and sagacity. Never forget that we may run the risk of being over-educated and yet under-cultivated.' This approach remains acceptable today." – *DSB VII*, p. 47.

 First edition. From the author of *Microbe Hunters*, one of the most successful science books published. Eleven vignettes are provided, with woodcut illustrations done in the manner of woodcut Russian Revolution portraiture of the 1920s. Illustrations are by Bertrand Zadig. "Unfortunately, little biographical information seems to exist on Bertrand Zadig...He was a well-known illustrator of books (particularly in the medium of the woodcut). Some of his illustrations may be found in such books as *Critical Woodcuts* (1926) and *Twelve Portraits of the French*

*Revolution* (1928). For a number of years, Bertrand Zadig also worked as a free-lance artist for the *New Yorker* and other major magazines” (artoftheprint.com). A contemporary review also notes, “The book is exceptionally well printed, with type that ought to delight the National Society for the Prevention of Blindness.”

- 1554 **LANE, Harlan** (b. 1936). *The Wild Boy of Aveyron*. Cambridge: Harvard University Press, 1976. ¶ Second printing. 8vo. [14], 351, [1] pp. Illus., index. Orange black-and gilt-stamped cloth, dust-jacket; jacket with two nicks and a small tear on rear. Jacket art, by Leonard Baskin, is vibrant. Very good. ISBN: 0674952820 \$ 5

“Through the autumn and winter of 1799 in the Department of Aveyron in central France, a naked boy was seen swimming and drinking in streams, climbing trees, running at great speed on all fours, digging for roots and bulbs in the field, and, turning toward the sky, rendering up deep cries and great bursts of laughter. Encouraged perhaps by the treatment he had received from the farmers in the region, urged on perhaps by hunger, on January 8, 1800, he approached the workshop of a farmer...” – jacket. The 12-year old boy’s name was given as Victor and Jean-Marc Itard became his teacher. Herein is the tale of the “enfant sauvage”, also made with that name into a movie by director Francois Truffaut.

First edition.

### *Breast Cancer Wars*

- 1561 **LERNER, Barron H.** (b. 1960). *The Breast Cancer Wars; Hope, Fear, and the Pursuit of a Cure in Twentieth-Century America*. Oxford: Oxford University Press, 2001. ¶ 8vo. xvi, 383, [1] pp. Illus., index. White red-stamped cloth, dust-jacket. Very good. ISBN: 0195142616 \$ 10  
"In this riveting narrative, Barron H. Lerner offers a superb medical and cultural history of our century-long battle with breast cancer. Revisiting the past, Lerner argues, can illuminate and clarify the dilemmas confronted by women with--and at risk for--the disease. Writing with insight and compassion, Lerner tells a compelling story of influential surgeons, anxious patients and committed activists. There are colorful portraits of the leading figures, ranging from the acerbic Dr. William Halsted, who pioneered the disfiguring radical mastectomy at the turn of the century to Rose Kushner, a brash journalist who relentlessly educated American women about breast cancer. Lerner offers a fascinating account of the breast cancer wars: the insistent efforts of physicians to vanquish the "enemy"; the fights waged by feminists to combat a paternalistic legacy that silenced patients; and the struggles of statisticians and researchers to generate definitive data in the face of the great risks and uncertainties raised by the disease. And for this new paperback edition, Lerner has included a postscript in which he discusses the most recent breast cancer controversy: do mammograms truly lower mortality rates or do they lead to unnecessary mastectomies?"

In Lerner's hands, the fight against breast cancer opens a window on American medical practice over the last century: the pursuit of dramatic cures with sophisticated technologies, the ethical and legal challenges raised by informed consent, and the limited ability of scientific knowledge to provide quick solutions for serious illnesses. The Breast Cancer Wars tells a story that is of vital importance to modern breast cancer patients, their families and the clinicians who strive to treat and prevent this dreaded disease." – OUP.

Reviews: [1] "Lerner, who teaches internal medicine, medical history and bioethics at the Columbia University College of Physicians and Surgeons, presents a thoroughly researched and deeply reflective history of breast cancer and the methods that have been employed to treat it."--Scientific American. [2]"A detailed, colorful account of the people and events that shaped breast cancer treatment, mostly in the last half of the century.... The story of the quest to improve treatment is captivating and should interest students of medical history, consumer advocates and health professionals, among others. Most interesting is Lerner's determination to show how social and cultural forces shaped trends in treatment."--Los Angeles Times. [3] "A fascinating, well-told tale with important lessons for scientists, clinicians, politicians, and patients."--*The Lancet*.

A brilliant study by two well-respected psychoanalysts who were also mother and son. Hunter eventually became a proponent of the position that mental illness was a matter of organic dysfunction. His mother remained a classic psychoanalyst.

- 1575 **MACDONALD, Michael. *Mystical Bedlam; Madness, Anxiety, and Healing in Seventeenth-Century England***. Cambridge: Cambridge University Press, 1988. ¶ 8vo. xvi, [2], 323, [1] pp. 27 tables, 6 figs., 5 maps, index. Printed wrappers. Near fine. ISBN: 052127382x \$ 32

"Mystical Bedlam explores the social history of insanity of early seventeenth-century England by means of a detailed analysis of the records of Richard Napier, a clergyman and astrological physician, who treated over 2000 mentally disturbed patients between 1597 and 1634. Napier's clients were drawn from every social rank and his therapeutic techniques included all the types of

psychological healing practised at the time. His vivid descriptions of his clients' afflictions and complaints illuminate the thoughts and feelings of ordinary people. This book goes beyond simply analysing mental disorder in a seventeenth-century astrological and medical practice. It reveals contemporary attitudes towards family life, describes the appeal of witchcraft and demonology to ordinary villagers, and explains the social and intellectual basis for the eclectic blend of scientific, magical, and religious therapies practised before the English Revolution. Not only is it a contribution to the history of medicine but also a survey of some of the darkest regions of the mental world of the English people of the seventeenth century." – Cambridge University Press.

- 1576 **MACKAY, Charles** (1814-1889). *Extraordinary Popular Delusions and the Madness of Crowds; With Facsimile Title Pages and Reproductions of original Illustrations from the Editions of 1841 and 1852; With a Foreword by Bernard M. Baruch*. New York: Noonday Press, 1974. ¶ Reprinted. 8vo. xxiv, [2], 724 pp. Frontis. portrait, illus., index. Red gilt-stamped cloth, dust-jacket; jacket with browning and small tear to back flap. First edition. "A collection of classic descriptions of disease by 179 different writers, from ancient times to the present. Foreign papers are translated into English. A second edition of this most interesting and useful book appeared in 1939, the principal additions being on the subjects of malaria and yellow fever, and a third edition was published in 1945." – Garrison and Morton 2241.

- 1578 **MALKIN, Harold M.** *Out of the Mist; The Foundation of Modern Pathology and Medicine During the Nineteenth Century*. Berkeley: Vesalius Books, 1993. ¶ First edition. 8vo. [4], viii, 422 pp. 29 plates, index. Blue gilt-stamped cloth, dust-jacket; jacket slightly worn. Correspondence laid in between author and reviewer Russell C. Maulitz; Maulitz's 1994 review in *Annals of Internal Medicine* also laid in. Home library catalogue label pasted to front paper. Very good. ISBN: 0963768905 \$ 49

"As its title suggests, Dr. Malkin's new book on the heroes of pathology and infectious diseases is an atavism. Yet, it is a surprisingly user-friendly throwback to a fading tradition of celebratory, triumphal narrative..." – Russell C. Maulitz.

- 1579 **MARKS, Lara V.** (1963). *Sexual Chemistry; A History of the Contraceptive Pill*. New Haven: Yale University Press, 2001. ¶ 8vo. xi, [1], 372 pp. 17 illus., 12 figs., 20 tables, index. Black gilt-stamped cloth, dust-jacket. Fine. ISBN: 0300089430 \$ 4.50

“Heralded as the catalyst of the sexual revolution and the solution to global overpopulation, the contraceptive pill was one of the twentieth century’s most important inventions. It has not only transformed the lives of millions of women but has also pushed the limits of drug monitoring and regulation across the world. This deeply-researched new history of the oral contraceptive shows how its development and use have raised crucial questions about the relationship between science, medicine, technology, and society. Lara Marks traces the scientific origins of the pill to Europe and Mexico in the early years of the twentieth century, challenging previous accounts that championed it as a North American product. She explores the reasons why the pill took so long to be developed and explains why it did not prove to be the social panacea envisioned by its inventors. Unacceptable to the Catholic Church, rejected by countries such as India and Japan, too expensive for women in poor countries, it has, more recently, been linked to cardiovascular problems. Reviewing the positive effects of the pill, Marks shows how it has been transformed from a tool for the prevention of conception to a major weapon in the fight against cancer.” – YUP.

- 1580 **MASTERS, David** (1883-1965). *Miracle Drug; The Inner History of Penicillin*. London: Eyre & Spottiswoode, 1946. ¶ 8vo. 191, [1] pp. Frontis., 22 illus., index. Blue gilt-stamped cloth; very slight fray to top spine. Gift inscription inked on half-title page, “To Major the Honorable J.B. Fermor-Hesketh, London [1947?], F. Lecher”. Very good. \$ 10

This copy was inscribed to Frederick Fermor-Hesketh, 2nd Baron Hesketh (1916-1955), a major in the Scots Guards. He was a world-class book collector.

- 1581 **MAULITZ, Russell Charles** (b. 1944). *Morbid Appearances; The Anatomy of Pathology in the Early Nineteenth Century*. Cambridge: Cambridge University Press, 1987. ¶ 8vo. ix, [1], 277, [1] pp. 8 figs., 1 table, index. Black gilt-stamped cloth, dust-jacket. Fine. ISBN: 0521328284 \$ 61

First edition. “When we consider how the scientific revolution came to medicine, we often think of the rise of the great laboratory disciplines of the nineteenth century. Often overlooked in these accounts, however, is the role of clinical medicine and its important early branch, pathology. *Morbid Appearances* traces the emergence in France and England of this important medical tradition. Dr. Maulitz shows how the pathology of tissues came to occupy a central position in the teaching and research of

French medical luminaries such as Bichat, Bayle, and Laennec, and he describes how the new pathology helped shore up the fortunes of the Paris medical faculty and the medicine of the 'Paris Hospital'. The author also details the efforts of Thomas Hodgkin, Robert Carswell, and others to import the new science of pathology to Great Britain - and he shows how their efforts to assign a place for pathological anatomy in their own medical culture met with rather mixed success." – *CUP*.

### *The Birth of American Gynecology*

- 1582 **MCGREGOR, Deborah Kuhn.** *From Midwives to Medicine; The Birth of American Gynecology*. New Brunswick: Rutgers University Press, 1998. ¶ 8vo. xii, 271, [1] pp. Illus., index. Original wrappers, in publisher's shrink wrap. Fine, as new. ISBN: 0813525721 \$ 18.95

"McGregor's account of Sims's remarkably varied career tracks his initial work as a plantation physician in the South who primarily cared for slaves. In the 1850s he moved to New York City, where he established Women's Hospital, which was frequented by "mostly Irish women as patients" (3). This endeavor was followed by his temporary sojourn during the Civil War in Europe, where he cared for European royalty. Sims's unique career played out through the social hierarchy. As is documented throughout this detailed book, social hierarchy as related to medical practice and experimentation rests at the very heart of the development of modern gynecology. The specialty of this field of medicine for women grew out of the experimental practices that Sims and his colleagues carried out on women of lower status. In order to advance the field, to attain institutional power and professional prestige, and to offer eventually more competent and less experimental care to women of means, poor women, slaves, immigrants, and women of the working class became the objects of medical experimentation carried out by Sims and his colleagues. They were the objects upon which specialty power was built." – *Journal of Health Politics, Policy and Law*, v. 25.3 p. 593.

- 1583 **McINNES, E. M.** *St. Thomas' Hospital*. London: George Allen & Unwin, 1963. ¶ First edition. 8vo. 230, [2] pp. Frontis., 14 illus., index. Sky-blue blind- and silver-stamped cloth, dust-jacket; jacket worn. Announcement from hospital administrators advising the book is now on sale, laid in. Very good. \$ 7

- 1584 **MEADE, Richard Hardaway** (1897-1993). ***A History of Thoracic Surgery***. Springfield: Charles C. Thomas, 1961. ¶ Thick 8vo. xx, 933, [1] pp. 114 illus., index. Blue-grey gilt-stamped cloth, dust-jacket; slight fading and near imperceptible tear to edge. Very good. Choice copy. \$ 125

*Early American Pharmacology*

- 1593 **National Medical Convention. *The Pharmacopoeia of the United States of America***. Philadelphia: John Grigg, 1831. ¶ 8vo. xxx, 268 pp. Indexes; waterstained throughout. Original full calf; extremities worn, spine repaired with kozo. Duke Hospital Library bookplate [gift of Dr. W.C. Davison], some marginalia, notes on endleaves [including a signature of A.W. Lloyd (rear), J.W. Mackasey (p.218)]. Good working copy. \$ 130

One of two competing “First Revisions” of the historic 1820 *Pharmacopoeia of the United States* (the other revision was published in New York in 1830). “...in the Philadelphia contingent were two physicians whose competent work and influential personalities would be decisive for the future of the *Pharmacopoeia of the United States*: George B. Wood and Franklin Bache. Among medical practitioners in general, now that the *Pharmacopoeia* seemed to be well established, interest in it waned. So much so that it is doubtful that pharmacopeial work would have persisted except for the prosperity of the *United States Dispensatory* prepared by Wood and Bache (see p. 279), who were now the key figures in carrying forward the further revision of the *Pharmacopoeia*.” – Kremer and Urdang, *History of Pharmacy*.

Offers a lot of interesting recipes and tinctures for medical needs. Opium is offered, ointments of various types, medicated wines, syrups, spirits, powders, pills, morphia, preparations of honey, liniments, infusa, applications of mercury, iron, copper or zinc, extracts, plasters, decoctions, confections, lime (solution of muriate of lime), prepared oyster-shell, arsenic, medicated waters, ammonia, alcohol, ethers, acids, vinegars, etc.

“The want of a National Pharmacopoeia had long been felt in this country as a serious evil, before any attempt was made to supply the deficiency” [Preface]. There was a lack of cooperation between various fragmented medical interest groups throughout the US in the period before 1820. In 1818 Dr. Lyman Spalding proposed a National Pharmacopoeia. By setting up four separate districts, and holding a general convention, progress was made. The first national pharmacopoeia was thus issued in 1820 and this 1831 represented a furtherance of that effort.

- 1601 **O'DONNELL, John M.** (b.1945). *The Origins of Behaviorism. American Psychology, 1870-1920*. New York: New York University Press, 1985. ¶ 8vo. xii, 299, [1] pp. 1 table, index. Brown gilt-stamped cloth, dust-jacket; jacket with tiny tear lower front edge, spine faded. AUTHOR'S INKED INSCRIPTION: "For Russ Maulitz, with admiration, John O'Donnell August 88". Very good. ISBN: 0814761623 \$ 50

First edition. "This is a tightened version of a doctoral dissertation already well known among historians of psychology. Like good dissertations. John O'Donnell's is based upon a mastery of primary sources, both archival and published. The author has, moreover, integrated secondary sources into the primary source findings in an exemplary way. The narrative reads well and makes strong and understandable arguments. Finally, not only is the topic significant, as the title suggests, but the approach is so broad that the work is virtually an imaginative rewrite of the general history of American psychology for a crucial half-century period." - John C. Burnham, *ISIS*, vol. 77, no. 3 (Sep., 1986): p. 532.

- 1602 **OGAWA, Teizo** (1901-1984) (editor). *History of Psychiatry – Mental Illness and Its Treatments – East and West*. Osaka: Saikon, 1982. ¶ 8vo. x, 216 pp. 2 graphs, 3 tables, 1 map. Orange blind- and gilt-stamped cloth. Small chip on end paper, and very minor paper stain to a single page (not affecting text). Very good. \$ 73.50

Proceedings of the 4<sup>th</sup> International Symposium on the Comparative History of Medicine – East and West; held October 21-27, 1979, Susono-Shi, Shizuoka, Japan. Ten original essays, five written by Westerners, and five by Japanese authors, explore "Mental Illness and Its Treatments" from medical, historical, and cultural perspectives.

- 1603 **OGAWA, Teizo** (1901-1984) (editor). *Public Health; The Proceedings of the 5<sup>th</sup> International Symposium of the Comparative History of Medicine – East and West*. Tokyo: Saikon, 1981. ¶ 8vo. vi, 189, [1] pp. 1 map, 1 chart. Green gilt-stamped cloth. Near fine. \$ 62

Contents: The development of hospitals and clinics in Japan (Kenzo Kiikuni); Policing public health in France, 1780-1815 (Ludmilla J. Jordanova); Roman medicine and public health (John S. Scarborough); Public health of ancient India (Kido Sugita); "Kogai," environmental pollution and the related public nuisance (Kazuo Nomiyama); Public health and "Koshu-Eisei" (Eiji Marui); From private hygiene to public health (Caroline C. Hannaway); The development of hygiene in Austria (Manfred Skopec); Sanitary reformers and the medical profession in Victorian England (Christopher J. Lawrence); Cholera in Japan (Shun-ichi Yamamoto).

- 1604 **OLESON, Alexandra; John VOSS** [eds.]. *The Organization of Knowledge in Modern America, 1860-1920*. Baltimore: Johns Hopkins University Press, 1979. ¶ 8vo. xxi, [3], 478, [2] pp. Tables, index. Blue silver-stamped cloth, dust-jacket; jacket somewhat worn. Good. ISBN: 0801821088 \$ 25

Contents: The Matrix of Specialization. The Order of Learning in the United States; The Ascendancy of the University; The Specialization of Science and Scholarship; The Plural Organized Worlds of the Humanities; The Development of the Social Sciences; The Physics, Mathematics, and Chemistry Communities: A Comparative Analysis; The Transformation of a Science: T. H. Morgan and the Emergence of a New American Biology; The Organization of the Agricultural Sciences; The Application of Science to Industry; The American Economy and the Reorganization of the Sources of Knowledge; The Institutional Context of Learning University Identity: The Teaching and Research Functions; National Science Policy in a Private Foundation: The Carnegie Institution of Washington; The National Academy of Sciences and the American Definition of Science; Storehouses and Workshops: American Libraries and the Uses of Knowledge; From Learned Society to Public Museum: The Boston Society of Natural History; Comparison and Commentary: The German Academic Community; The Lamp of Learning: Popular Lights and Shadows; Toward an Ecology of Knowledge: On Discipline, Context, and History.

- 1605 **O'MALLEY, Charles Donald** (1907-1970). *English Medical Humanists; Thomas Linacre and John Caius*. Lawrence: University of Kansas Press, 1965. ¶ 8vo. [6], 54 pp. Index. Green silver-stamped cloth, dust-jacket; jacket browned. Very good. \$ 10

Logan Clendening Lectures on the History and Philosophy of Medicine, Twelfth Series.

- 1607 **O'MALLEY, Charles Donald** (1907-1970) (editor). *The History of Medical Education; An International Symposium held February 5-9, 1968*. Berkeley: University of California Press, 1970. ¶ Tall 8vo. xii, 548 pp. 41 figs. on plates, index. Two-tone white and green gilt-stamped cloth, dust-jacket; jacket somewhat worn. Very good. \$ 30  
First Edition. UCLA Forum in Medical Sciences series, number 12. Contributors include C. H. Talbot, Luigi Belloni, G. A. Lindeboom, Erna Lefsky, F. N. L. Poynter, M. D. Grmek, Pierre Huard, John Z. Bowers, and Francisco Guerra. The symposium was sponsored by the UCLA Department of Medical History. Garrison and Morton.  
☼ Garrison and Morton 1766.608.
- 1608 **OSLER, William** (1849-1919). *Aequanimitas; With Other Addresses to Medical Students, Nurses, and Practitioners of Medicine*. Philadelphia: Blakiston, 1952. ¶ 8vo. x, 451, [3] pp. Green blind- and gilt-stamped cloth. Announcement laid in by Eli Lilly, to "Dear Doctor" offering the volume as a graduation gift. Near fine. \$ 20  
Third edition. Accepting a free book upon graduation from medical school, especially when the giver was Big Pharma, was acceptable in 1952, but decidedly against Osler's rigid moral principles for physicians. The lessons of the essays, however, remain relevant even today.
- 1609 **PACKARD, Francis Randolph** (1870-1950). *Some Account of the Pennsylvania Hospital; From Its rise to the Beginning of the Year 1938*. Philadelphia: Engle Press, 1938. ¶ 8vo. xii, 133, [1] pp. Frontis., 25 plates, illus. Original tan cloth-backed boards two-tone beige and tan hardcover with printed paper label. Very good. \$ 17  
The book is typeset and written as an homage to Benjamin Franklin's "Some Account of the Pennsylvania Hospital; From its first Rise, to the Beginning of the Fifth month, called May, 1754." The typeface of the book, Caslon, is that used by Franklin's print shop.
- 1610 **PEITZMAN, Steven Jay** (b. 1945). *A New and Untried Course; Woman's Medical College and Medical College of Pennsylvania, 1850-1998*. New Brunswick: Rutgers University Press, 2000. ¶ 8vo. xiii, [3], 322, [2] pp. 30 illus., index. Original wrappers. Inked author's inscription: "For Russ, Friend and comrade in history (and medicine) co-laborer at 'MCPHU' (see the 'Afterword' for details). Steve Peitzman, 1 June 2000". Near fine. ISBN: 081352816x \$ 16  
"Steven J. Peitzman, M.D., is a professor of medicine and former archives historian at MCP Hahnemann School of Medicine."

- 1611 **PELICIER, Yves** (1926-1996). *Histoire de la Psychiatrie*. Paris: Presses Universitaires de France, 1971. ¶ Small 8vo. 128, [8] pp. Index. Original wrappers; some fading. Very good. \$ 5

- 1612 **PORTER, Roy** (1946-2002) (editor). *Patients and Practitioners; Lay Perceptions of Medicine in Pre-Industrial Society*. Cambridge: Cambridge University Press, 1985. ¶ 8vo. [6], 356 pp. 1 fig. Black gilt-stamped cloth, dust-jacket. Near new. ISBN: 0521309158 \$ 31.95

"This is a series of 11 studies, all but two of which focus on England in the 17th and 18th centuries. (One contribution is concerned with classical antiquity and another with traditional Arabic medicine.) The studies are based on diverse sources, examine different individuals and communities, and analyze separate fragments of a larger question—the interplay of health, culture, and society. Although diverse, the studies share a common goal: the understanding of health, sickness, and therapy from the perspective of the patient and the layman. This is not a book in which physicians command center stage. Even Galen is reduced to the status of a minor sycophant. Indeed, it is a central theme of this volume that physicians in preindustrial societies—and healers in general—appeared and served only at the beck and call of patients and their families." – Morris J. Vogel, *JAMA*, Vol 257.

- 1613 **PURVER, Margery**. *The Royal Society; Concept and Creation*. London: Routledge and Kegan Paul, 1967. ¶ 8vo. xvii, [1], 246 pp. 12 illus., index. Red gilt-stamped cloth. Near fine. \$ 8

Introduction by Hugh Trevor Roper (1914-2003), the always controversial (and in the case of Adolph Hitler's "diaries", as well as the historical role of Count Folke Bernadotte, wrong) historian. The book expands Purver's 1959 doctoral thesis and includes an interesting discussion of the origins of the invisible college (pp. 193-205).

- 1614 **RADCLIFFE, Walter**. *Milestones in Midwifery*. Bristol: John Wright & Sons, 1967. ¶ 8vo. x, 110 pp. 7 figs., 8 plates, index. Taupe gilt-stamped cloth; slight bump to corner. Very good. \$ 25

An excellent copy of a classic work on obstetrics and midwifery, from the 16<sup>th</sup> century to about 1950. Foreword by David Brown.

- 1615 **RETTIG, Richard A.** *Cancer Crusade: The Story of the National Cancer Act of 1971*. Princeton: Princeton University Press, 1977. ¶ 8vo. xix, [3], 382, [2] pp. 1 illus., 2 tables, index. Blue gilt-stamped cloth, dust-jacket; jacket slightly rubbed. Occasional pencil and ink

marginalia. Very good. Scarce in hardcover with jacket. ISBN: 0691075581

\$ 12

“This blow-by-blow account of the not-so-behind-the-scenes lobbying for the National Cancer Act of 1971 is a useful source for readers who worry about policy-making processes and wonder how much ‘pre-legislative’ activity determines the legislative outcome. Should one believe that wealth, power and social presence are prerequisites for influence in Washington? The answer from Cancer Crusade is an unqualified yes.” – [Review]. *Bulletin of the Atomic Scientists*, Feb. 1978.

- 1616 **RIPMAN, Hujohn Armstrong** (1918-2010) (editor). *Guy's Hospital 1725-1948*. London: Guy's Hospital Gazette Committee, 1951. ¶ 8vo. 175, [1] pp. Color frontis., 5 color plates, 66 illus., tables, index. Aqua blind-and gilt-stamped cloth, dust-jacket; jacket worn. Good. \$ 15

Published almost on the hospital's quasiquibicentennial, the five essays focus on various aspects of the hospitals history and services: *History of Guy's Hospital; The Medical School; The Dental School; Nursing at Guy's; Guy's Hospital in 1948*.

- 1618 **RISSE, Guenter B.** (b. 1932). *Hospital Life in Enlightenment Scotland; Care and Teaching at the Royal Infirmary of Edinburgh*. Cambridge: Cambridge University Press, 1986. ¶ 8vo. xiv, 450 pp. 33 tables, 12 figs., index. Black gilt-stamped cloth, dust-jacket. Fine, near new. ISBN: 0521305187 \$ 32

- 1619 **RORTY, James** (1890-1973). *American Medicine Mobilizes*. New York: W. W. Norton, 1939. ¶ First edition. 8vo. 358, [2] pp. Index. Blue blind-and gilt-stamped cloth, dust-jacket; jacket extremities worn – book is very good. Ownership rubberstamp of John H. Cook, Trenton, NJ. Very good. \$ 11

« Plus ça change, plus c'est la même chose. » The 1939 book explores the “major issue before the American people today”: nationalizing health care. Very little has changed in the foundational pros and cons. An excellent historical reference to the roots of the healthcare debate in the United States. The dust-jacket art is a wonderful example of 1930s-1940s American modernism.

- 1620 **ROSEN, George** (1910-1977). *A History of Public Health*. New York: M.D. Publications, 1958. ¶ First edition. 8vo. 551, [1] pp. 8 tables, indices. Teal gilt-stamped cloth, dust-jacket; jacket with minor tears to spine and edges. Very good. \$ 25

Cambridge: Cambridge University Press, 1986. ¶ 8vo. xvi, 207, [1] pp. 18 tables, 15 figs., index. Black blind-and gilt-stamped cloth, dust-jacket. Near fine. ISBN: 0521309999 \$ 75
- 1632 **SIGERIST, Henry Ernest** (1891-1957). *Socialised Medicine in the Soviet Union*. London: Victor Gollancz, 1937. ¶ 8vo. 397, [1] pp. 24 photographic plates, tables, index. Original printed orange black-stamped wrappers; some soiling and light wear, corner creased. Very good. \$ 26  
Foreword by Sidney Webb (1859-1947), one of the earliest members of the Fabian Society.  
Sigerist was a life-long believer in socialized medicine, and played a critical role in the establishment of Canada's national health system. This is a "Left Book Club edition – Not for Sale to the Public." The picture of Soviet medicine is favorably biased. The photographic plates are classic images of healthcare in the workers' paradise. Still, Sigerist stays true to statistical realities regarding the core of health care in the Soviet Union of 1935.
- 1633 **SIGERIST, Henry Ernest** (1891-1957). *The University at the Crossroads; Addresses and Essays*. New York: Henry Schumann, 1946. ¶ 8vo. ix, [1], 162 pp. Index. Navy gilt-stamped cloth. Very good. \$ 8

Madison: University of Wisconsin Press, 1953. ¶ 8vo. xv, [1], 304 pp. Frontis. portrait, 2 plates, index. Burnt-orange black-stamped cloth, dust-jacket; jacket quite fragile with chips, tears, and fading. Book shop stamp on front paper with owner's inked name on label "Maulitz". Thus, book good, d.j. poor. \$ 60
- A seminal biography of a three-dimensional Rudolf Virchow. The chapters in the section *The Statesman* reaffirm Virchow's political and philosophical tenets that shaped the use of his scientific discoveries. "The most important work on Virchow... an analysis of Virchow's ideas, works, and accomplishments" – *DSB*, vol. XIV, p.43.
- 1650 **[VIRCHOW, Rudolf Ludwig Karl] JACOBI, Abraham** (1830-1919). *Rudolf Virchow; An Address, Introductory to the Course of Lectures of the Term, 1881-82*. New York: Trow's Printing and Bookbinding, 1881. ¶ Small 8vo. 35, [1] pp. Disbound; creased. Text quite clean. Good. \$ 22

Jacobi was a giant of American pediatrics, and he remains the only foreign-born President of the American Medical Association. His view of pediatrics included the social and cultural aspects of caring for children. It is in this light that he addresses Rudolf Virchow. Virchow's seminal work in cellular theory and biology often overshadows Virchow's view that medicine was more than science. A memorable Virchow aphorism is, "Medicine is a social science and politics are nothing but medicine on a grand scale." Social and political reforms based on medical knowledge were critical to the public's health. Jacobi adopts this perspective in his laudatory discussion of Virchow. – *Formative Years Children's Health in the United States, 1880-2000*. Stern & Markel, editors.

- 1651 **[VIRCHOW, Rudolf Ludwig Karl] POSNER, Carl** (1854-1929). *Rudolf Virchow: Meister der Heilkunde*. Wien: Rikola, 1921. ¶ 8vo. 91, [1] pp. Frontis. portrait, index. *Critical Artifact of the WWII Warsaw Ghetto and Holocaust*

- 1658 **[WARSAW GHETTO] APFELBAUM, Emil** (1895-1946) (editor). ***Maladie de Famine; Recherches Clinique sur la Famine Exécutées dans le Ghetto de Varsovie en 1942.*** Varsovie: American Joint Distribution Committee, 1946. ¶ 8vo. 264, [4] pp. 11 black and white photographic plates, 50 tables, charts, index. Original printed wrappers; scotch tape along spine, front and rear covers age-darkened, first 3 pages (including half title), and last three blank end-papers are loose. Main body of work remains bound and in good condition. Loose pages have some slight area of extremities missing. Some fading and foxing to pages. Thus, wrappers poor, but text good to good plus. \$ 750

First edition. SEMINAL WORK IN MEDICAL CLINICAL RESEARCH & A CRITICAL ARTIFACT OF THE WARSAW GHETTO AND HOLOCAUST. Copies of the book are uncommon, in part because of the fragile nature of the paper used to publish the report. In the immediate aftermath of World War II, paper, ink, and binding facilities in Europe were scarce. The published report was done with economy in mind, and with a rushed sense of needing to reveal to the world what happened.

Six articles report on the clinical research by 28 Jewish physicians and a student intern (the 1946 book only records the names of 21 physicians and the student – subsequent research in the 1960s revealed the additional names) who conducted the studies on adults and children at the two Jewish hospitals in the Ghetto.

Abbreviated biographies of the physicians can be found in *The Uses of Adversity: Studies of Starvation in the Warsaw Ghetto* by Leonard Tushnet, published in 1966. The physicians hoped to study these patients to somehow benefit humanity, perhaps in the spirit of the Jewish concept of *tikkun olam* - to repair the world. The studies were conducted in secret, since any scientific research in the Ghetto was

prohibited by the Nazi overseers. It is also quite possible that many, if not all, the clinical physicians believed that granting children and others the status of being a patient would protect them by preventing their transport out of the ghetto to death camps. Theories also suggest that the physicians wanted to preserve a record of the atrocities being committed, as well as advance medical research. The studies remain the most comprehensive research of the effects and progression of starvation, in part because any contemporary studies would largely be blunted by existing ethical guidelines for informed consent and subject welfare. Contemporary debates about the ethical wisdom of conducting these studies remains contentious.

The Warsaw Ghetto occupied approximately 1.3 square miles (3.4km<sup>2</sup>), and its population was as much as 500,000 men, women, and children. The Ghetto was a staging area for transporting Polish and Eastern European Jews to the death camps, and a locale for starving to death Jews prior to transport. The average daily caloric intake of a resident of the Ghetto was 600 to 800 calories of low-protein food for adults. This amount was calculated by Adolf Eichmann to starve-to-death most of the residents in approximately nine months. The physicians performing the research were no exception to the plan. All were starving as they performed their studies. Equipment for clinical research was smuggled into the hospitals.

Each article in the book is devoted to specific results of these studies. Chapter V offers autopsy results on 710 patients; 492 died of starvation and 218 died of complications of secondary conditions. Chapter VI offers clinical observations of one-hundred adults who died from starvation. Chapter VII offers clinical observations of 40 children who died of starvation. Chapter VIII examines the effects of starvation on the cardiovascular system in adults and children. Chapter IX discusses changes in peripheral blood and bone marrow. Ophthalmic responses to starvation are discussed in Chapter X. Only one doctor engaged in the research, Emil Apfelbaum, survived the war. He arranged to have the studies smuggled out of the Ghetto to a Polish professor of medicine, who released the reports after the liberation of Warsaw. After the war, Apfelbaum edited the report for publication by the Joint Distribution Committee. He died a week before the book was published.

Research was performed at the two hospitals in the Ghetto from late February to July 22, 1942. On July 22 the hospitals were closed and any patients unable to be transported were summarily executed regardless of age. The attending and clinical physicians were fully aware of the fate awaiting transported patients, and in many instances, they performed euthanasia on elderly and child patients who were scheduled for transport. Some of the physicians committed suicide rather than face

transport. Other physicians accompanied their patients to the death camps, providing whatever aid they could.

The studies were smuggled out of the ghetto in a manner befitting a Ken Follet thriller. A Jewish physician, Henryk Fenigstein, played a crucial role. "Before the war Henryk was a stamp collector. In fact, he had one of the largest collections of Polish stamps in the country. One day two SS members arrived at the hospital and told Henryk to come with them to Gestapo headquarters. Of course, he was terrified. Jews taken to Gestapo headquarters did not return. On arrival he was taken to the office of a senior officer who told him that he himself was an avid stamp collector. He took out a list and handed it to Henryk. He wondered if Henryk had these stamps and if not if he knew where to procure them. Henryk told him that he had many of the stamps, including some of the very rare ones. He told him that he thought he could procure the rest. In order to do this he would need a pass to get out of the ghetto for a few hours each week. And of course the SS officer was welcome to those that he had. The officer agreed and even gave Henryk his phone number in case he needed any help. Thus, Henryk Fenigstein, a key member of the study team, was able to leave the ghetto" (2005 lecture, Myron Winick). During such an outing, Fenigstein arranged for the smuggling of the reports. A pregnant woman reportedly was used to hide the documents and transport them out of the ghetto.

The supervising physician of the project, Israel Milejkowski, wrote in his Introduction to the studies that each author refused to allow the Nazis to destroy their work, and that through the research and the publication of that research, "Nous avons terminé nos Recherches et nous les conserverons bien, comme c'était Ton désir. Les paroles immortelles que Tu à jetées "Non omnius Moriar" doivent être en premier lieu appliquées à Toi! Gloire éternelle a Ta Mémoire !"

The research, as well as results from the Minnesota Semi-Starvation studies of 1944-1945, continues to benefit the millions of persons facing starvation each year. The participants in the Minnesota study lost an average of 25% of pre-test body weight, and the final phase of the study included recovery techniques and methods. The Warsaw studies measured effects until death. This artifact of scientific integrity, individual bravery, and resistance to oppression, is a rare opportunity to truly own a small piece of history illuminating the courage of physicians determined to use their craft to help the world and advance the memory of atrocities.

- 1659 **[Warsaw Ghetto] WINICK, Myron** (1929-2012) (editor). *Hunger Disease; Studies by Jewish Physicians in the Warsaw Ghetto*. New York: John Wiley & Sons, 1979. ¶ 8vo. xiv, 261, [1] pp. 11 black and white

photographic plates, 50 tables, charts, index. Black blind- and gilt-stamped cloth, dust-jacket. Near fine. ISBN: 0471050032 \$ 82

First edition in English, translated from the Polish by Martha Osnos, who escaped from the Ghetto and made her way to Stanford University. Osnos was also a friend of Janusz Korczak.

This translation of the starvation studies performed at the Warsaw Ghetto is from the Polish manuscript, rather than the French publication of the American Joint Distribution Committee published in 1946. This accounts for slight variations in a comparison of the French and English translations. Winick was a noted nutritionist and physician, and was Director of the Institute of Human Nutrition, Columbia College of Physicians and Surgeons.

["on front paper"] I have removed every one of these references of the location of signatures and bookplates – they are by default always on the front pastedown or front free endpaper [ffep], thus it is implied. State the exception, not the normal... i.e., if the author's or owner's name is on the back endpaper, then say where, especially if on the title or elsewhere in the textblock. - Palmer H.

*Signed by Both Authors*

- 1664 **WELLS, Calvin**. *Bones, Bodies and Disease; Evidence of Disease and Abnormality in Early Man*. London: Thames and Hudson, 1964. ¶ Series: Ancient Peoples and Places, no. 37. 8vo. 288 pp. 88 photographs, 33 drawings, 4 tables, 3 graphs 1 histogram, index. Black blind- and gilt-stamped cloth, dust-jacket. Very good. \$ 11

- 1665 **WELLS, Susan.** *Out of the Dead House; Nineteenth-Century Women Physicians and the Writing of Medicine.* Madison: University of Wisconsin Press, 2001. ¶ 8vo. xii, 312 pp. 18 illus., index. Printed wrappers. Fine. ISBN: 0299171744 \$ 20

This book rediscovers women doctors who helped create styles of medical writing still used today. "In the last decades of the nineteenth century, two thousand women physicians formed a significant and lively scientific community in the United States. Many were active writers; they participated in the development of medical record-keeping and research, and they wrote self-help books, social and political essays, fiction, and poetry. *Out of the Dead House* rediscovers the contributions these women made to the developing practice of medicine and to a community of women in science. Susan Wells combines studies of medical genres, such as the patient history or the diagnostic conversation, with discussions of individual writers. The women she discusses include Ann Preston, the first woman dean of a medical college; Hannah Longshore, a successful practitioner who combined conventional and homeopathic medicine; Rebecca Crumpler, the first African American woman physician to publish a medical book; and Mary Putnam Jacobi, writer of more than 180 medical articles and several important books. Wells shows how these women learned to write, what they wrote, and how these texts were read. *Out of the Dead House* also documents the ways that women doctors influenced medical discourse during the formation of the modern profession. They invented forms and strategies for medical research and writing, including methods of using survey information, taking patient histories, and telling case histories. *Out of the Dead House* adds a critical episode to the developing story of women as producers and critics of culture, including scientific culture."

"A highly original contribution to studies of the relationship between gender, medicine, and science, offering fresh insights regarding the entrance of women into the medical profession. Wells's nuanced story will appeal to literary scholars, medical historians, and all readers interested in revisiting this complex and rewarding terrain."—Regina Morantz-Sanchez, author of *Conduct Unbecoming a Woman: Medicine on Trial in Turn-of-the-Century Brooklyn*. Susan Wells is professor of English at Temple University. She is the author of *Sweet Reason: Rhetoric and the Discourses of Modernity* and *The Dialectics of Representation*." – UWP.

- 1666 **[Who's Important in Medicine] Institute for Research in Biography.** *American Men of Medicine; Third Edition of Who's Important in Medicine.* Farmingdale: Institute for Research in Biography, 1961. ¶ Thick 8vo. [6], vi, [2], 768 pp. Red gilt-stamped pebbled cloth. Very good. \$ 9

Interesting artifact of another era, when it was presumed that all the important physicians were male. The Institute for Research in Biography (IRB) was a for-profit database modeled on *Who's Who*, existing on revenue generated by the copies ordered by those profiled. It remains an excellent source of medical biography, and a reminder that ego is as great a force in publishing, sometimes, as achievement.

- 1667 **WILSON, David.** *Penicillin in Perspective*. London: Faber & Faber, 1976. ¶ 8vo. [10], 298, viii pp. Bibliography. Orange gilt-stamped cloth, dust-jacket; jacket with single small tear to bottom corner. Owner's name inked, Russell C. Maulitz. Review in TLS laid in. Very good. ISBN: 0571108393 \$ 10

- 1669 **WILSON, Renate** (1930-2008). *Pious Traders in Medicine; A German Pharmaceutical Network in Eighteenth-Century North America*. University Park: Pennsylvania State University Press, 2000. ¶ 8vo. xiv, 258 pp. 15 figs., 15 tables, index. Black white-stamped cloth, dust-jacket. Very good. Scarce in jacket. ISBN: 0271020520 \$ 30

“A fundamental contribution to the discussion of the ‘medical marketplace.’ Wilson demonstrates the intimate associations between religious and medical Pietism and their commercial underpinnings in ways previously hardly imagined. Her careful and painstaking archival investigations are presented clearly and vigorously. This is a path-breaking work of impeccable scholarship, innovative and well written.” – Harold J. Cook, University of Wisconsin, Madison Medical School. Winner of the 2003 St. Paul Prize of the Lutheran Historical Society of the Mid-Atlantic Region Winner of the Kremers Award from the Institute for the History of Pharmacy at Wisconsin, Madison. [PSUP].

Issued in paperback and hardcover; this is the hardcover. “Dr. Wilson, a longtime adjunct professor at the Johns Hopkins Bloomberg School of Public Health, was well-known for her research on the history of medicine and cross-cultural studies of health services. She spoke English, German and French, and she often made appearances at international conferences...Renate Fischer graduated from Humboldt University and worked as an actress. In her most well-known role, she played the female lead in *Der Untertan*, a film based on the novel by Heinrich Mann and a satirical look at nationalism in Germany. Deciding to pursue “more intellectual endeavors,” she went to work for the U.S. Embassy in Berlin as a translator...” She wrote *Pious Traders* on a Fulbright Fellowship studying medicine in America. – (Obituary, *The Baltimore Sun*, January 31, 2008).

- 1670 **WOOD, Horatio C Jr.** (1841-1920). *Reminiscences of an American Pioneer in Experimental Medicine; Dr. Wood as a Medical Practitioner by G.E. de Schweinitz; Dr. Wood's bibliographical record*. Philadelphia, 1920. ¶ 8vo. 69, [1] pp. Frontis. portrait, 2 portrait plates. Grayish-blue gilt-stamped cloth, top edge gilt. Near fine. \$ 67

Wood requested in his will that his reminiscences of his life in medicine were to be published in a special edition of the *Transactions of the College of Physicians of Philadelphia*. This small volume was the result. A memorial essay by George Edmund De Schweinitz (1858-1938) reflects on Wood as teacher of medicine. Wood served as a field surgeon for the Northern Army during the Civil War, and his reflections on his Civil War experiences are brief but compelling. Wood's son sternly admonished anyone who asked that his father had no middle name, only the initial "C" without a period.

- 1671 **WOOD, Horatio C Jr.** (1841-1920). *Thermic Fever, or Sunstroke*. Philadelphia: J. B. Lippincott & Co., 1872. ¶ Small 8vo. 128, [16] (ads) pp. Tables. Reddish-tan gilt-stamped cloth; lower spine frayed. Penciled ownership name Wm. Iames [James?]. Very good. Scarce. \$ 150

First edition. Wood's "first important experimental paper reported 'On the Medical Activity of the Hemp Plant, as Grown in North America' (1869. Among his most important subsequent investigations, as Wood himself believed, were studies of the physiology and treatment of sunstroke, the mechanism and treatment of fever, the discovery of the physiological and therapeutic action of hyoscine, and the treatment of accidents of anesthesia." – *DSB*, XIV, p. 496.

- 1672 **WOODWARD, John.** *To do the Sick No Harm; A Study of the British Voluntary Hospital System to 1875*. London: Routledge & Kegan Hall, 1974. ¶ 8vo. xii, 221, [3], 14 pp. Tables, index, ads. Wine-red gilt-stamped cloth, dust-jacket. Near fine. ISBN: 0710079702 \$ 15

- 1673 **[WRIGHT, Sir Almroth Edward (1861-1947)] COLEBROOK, Leonard (1883-1967).** *Almroth Wright, Provocative Doctor and Thinker*.
